Shanghai Fastener Industrial Association Convenes the 3rd Term of BoD Meeting

In order to strengthen the productivity of the industry, set up the work objectives of the board of directors and promote the operation of the association, Shanghai Fastener Industrial Association held the third term of board of directors meeting on September 27th in the meeting room of Shanghai Chun Zu Machinery, a professional manufacturer of cold forging machines, thread rolling machine, and relevant molds. Before the meeting started, the guests also took the opportunity to observe the operation and management of Shanghai Chun Zu's workshop, and General Manager of Shanghai Chun Zu gave a short corporate presentation.

The conference touched on many important issues in the industry, including the current state of the automotive industry, future development trends and the next step in the requirements for automotive fasteners, molds and dies, carbon neutrality, and so on. Representatives of important enterprises also exchanged and shared their views on the current market situation of the industry, encouraging them to be united and have confidence in the development of the industry.

Shanghai Fastener Industrial Association President Bian said: "The future work of the association will focus on strengthening the organizational structure, enhancing the service level, promoting the development of the industry, strengthening the network publicity, expanding external exchanges, and strengthening the technological innovation". He also mentioned that he would actively seek support from all parties to create a good external environment for the development of the organization and to increase the visibility and influence of the association to ensure smooth implementation of the work plan.

Seminar for Fastener Enterprises Held in Yongnian, Handan

In order to listen to the opinions and suggestions of the enterprises on the development of the industry and the "Enclaves Economy" Industrial Park, a seminar for fastener enterprises was held in Yongnian, Handan on September 21st, which was attended by representatives of many local fastener enterprises.

Yongnian District Chief Ning Zhang said: "Yongnian High-End Fasteners & Enclave Economy Industrial Park is an important initiative of Handan City to break the geographical boundaries, promote the optimal allocation of resources and accelerate the high-quality development of the economy and society, and it is also a valuable opportunity for the transformation and upgrade of the fastener industry. We hope that the enterprises concerned will seize the opportunity, draw on collective wisdom and consensus, and work together to promote the transformation of Yongnian fastener industry into high-end, intelligent, and green development." Chief Zhang also mentioned that the relevant departments must seriously listen to the views and suggestions of enterprises, think differently, and help enterprises solve problems and get out of the predicament together, and provide support for the development of enterprises.

温州市紧固件行业协会

Wenzhou Fastener Industry Association Held the Fifth Term of Membership Meeting

Wenzhou Fastener Industry Association's Fifth Term of Membership Meeting was held on September 19th at Shangri-La Wenzhou Hotel, inviting many elites in the fastener industry to witness the prosperous development of Wenzhou fastener industry. Many excellent enterprises were also present to exhibit their products and technologies.

During the meeting, Wenzhou Fastener Industry Association President Ji, on behalf of the Board of Directors, made a report on the work of the Association, reviewing with the members the efforts and achievements made by the Association in the past year in the promotion of industrial upgrade, strengthening industry self-discipline and protecting the rights and interests of members, etc. At the same time, he also made a report on the annual work plan for the next year. He said, "We will continue to deepen the services of the Association and promote the high quality development of the industry".

Wenzhou Fastener Industry Association even signed a financial credit agreement with a local bank in the presence of its members, hoping to inject a strong impetus to the development of the industry. The efforts made by the Association in the past few years in promoting the industry's technological innovation, market development, social contribution, etc., were also highly praised by the Chairman of China General Machine Components Industry Association (CMCA), President of CMCA Fastener Subdivision, and other members on-site.

Jiangsu Fastener Association's "Fastener College" Holds First Management Training Course

Jiangsu Fastener Association (JSFA)'s "Fastener College" held its first training course on September 23rd in the conference room of Dainan Fastener Industrial Park. The first course was based on the theme of talent selection and appointment, and the inauguration ceremony was also held at the same time, which was attended by Jiangsu Fastener Association President Jiang and Executive Secretary General Hsu. Fastener College is a training and learning exchange platform built by Jiangsu Fastener Association in cooperation with an external organization to provide free management training courses for the Association's members.

In his speech, Persident Jiang encouraged the members to enhance their learning, learn from theories, and actively communicate and explore with each other. He also mentioned that the Association will continue to provide members with quality services to help each other learn and exchange, and hoped that members would actively participate in the Association's activities and put forward more suggestions in the future.

Jiangsu Fastener Association and Suzhou Fastener Association Visit Dainan Fastener Industry Association

On Aug. 21st, Jiangsu Fastener Association and Suzhou Fastener Association paid a special visit to Dainan Fastener Industry Association located in Xinghua City, hoping to give full play to the association's advantages to strengthen the development of the fastener industry on one hand, and further promote the integration of resources, cohesion and future cooperation and development of the association through the communication, understanding and interaction amongst the associations on the other hand.

As the fastener industry is increasingly concerned about issues such as green and sustainable development, the attending association representatives also visited the Cleaning Center in Dainan Industrial Park. The Center basically helps enterprises in Dainan and the surrounding areas to reduce the pollution to the environment and water source from the root, and on the other hand, it can optimize the production, reduce energy consumption & carbon emissions, so as to realize the goal of green production.

After the visit, the tripartite associations also held an exchange forum, where representatives of the associations and member enterprises took turns to give a briefing on the current development of the associations or enterprises, as well as their own development advantages and products, in the hope that the rare tripartite exchanges

could strengthen mutual communication, open up opportunities for cooperation, establish smooth communication channels, and achieve the goal of resource sharing and mutual benefit.

Dainan Fastener Industry Association President Chiu said: "The future development of Dainan fastener industry should continue to follow the line of specialization, refinement, characterization and innovation. We will increase our efforts in the R&D and applications of special materials, improve quality, develop new products, and invest more in intelligent production and digital management. In the face of increasingly diversified market demand, fastener companies have turned to market segmentation and customized services. Through in-depth understanding of different industries, different applications based on specific needs, enterprises can provide more accurate and professional fastener solutions. Fastener enterprises should also actively seek international cooperation, through participation in international exhibitions, the establishment of cross-border cooperation, etc., to open up markets and enhance the brand's international influence. At the same time, they should promote their own technological innovation and management upgrade, so as to lay a solid foundation for the long-term development of enterprises."

Suzhou Fastener Intelligent Manufacturing Chamber of Commerce Holds 1st Term of Members Meeting

Suzhou Fastener Intelligent Manufacturing Chamber of Commerce (SFIMCC) held its first term of members meeting with the theme of "Fastening Suzhou & Connecting the World with Intelligence" on August 3rd at Hotel Nikko Suzhou. During the meeting, a number of association executives, business representatives and industry professionals were invited to hold a roundtable discussion on the current state of the industry and its future prospects from the perspectives of market, technology, equipment, politics, science and technology and innovation, etc.

During the members meeting, President Yu of SFIMCC also took the stage to brief the members on the work of SFICC, President Yu mentioned: "SFIMCC has to continuously improve its service capability and provide member enterprises with services such as policy consultation, market information, technical support, etc., to help them solve practical problems and facilitate their healthy development."

During the meeting, President Yu also signed strategic cooperation agreements with several fastener industry associations and banks to work together towards the goal of pursuing greater business value and development opportunities. President of CMCA Fastener Subdivision, President of Shenzhen Fastener Industry Association and important officials of Suzhou City also delivered speeches, encouraging to strengthen the cohesion, common development and create a better future together!

Main Products:

- ▶ Self-Clinching Studs, Nuts, Standoffs
- ▶ Rivet Bushes
- ▶ Welding Studs and Standoffs
- ▶ Brass Inserts for Plastics
- ▶ Cage Nuts
- ▶ Rivet Nuts
- ▶ Customized Parts via Cold Forging, CNC, Turned

Strengths:

- ✓ Producer in China
- ✓ IATF 16949 QMS certified
- ✓ PPAP package and IMDS for automotive industry
- ✓ Automatic Optical Sorting 100%
- ✓ Full range for sheet metal fasteners and 200 million stocks

CMCA Fastener Subdivision Visits Zhejiang Institute of Advanced Materials for Exchange

CMCA Fastener Subdivision, led by President Kang-Sheng Xue and other important reps, visited Zhejiang Institute of Advanced Materials on July 8 to have a discussion and exchange views on the current status and future development of the fastener industry, which was the first all-round exchange after the signing of the strategic cooperation between the two parties in May this year.

President Xue said: "The current market environment, industry volatility and overcapacity are not only challenges but also opportunities for the fastener industry, which has experienced rapid development for more than 40 years. The cooperation between the two parties is expected to promote productivity and have a positive impact on the development of the fastener industry in China."

President Dong of Zhejiang Institute of Advanced Materials said: "We will actively integrate into the trend of the new round of technological and industrial changes, actively cooperate with the Fastener Association, and utilize our advantages and resources to further promote the high-quality development of the fastener industry."

Jiangsu Machinery Industry Association Convenes Permanent Directors Meeting

Jiangsu Machinery Industry Association Fastener Subdivision Permanent Directors Meeting was held on June 29th in Changshu. Nearly 50 leaders and guests, including Dainan Fastener Industry Association, Dongtai Fastener Industry Association, and Suzhou Fastener Industry Association, attended the meeting.

In addition to the summary report on the work of the Association in the first half of 2024, industry experts were also invited to deliver keynote speeches on the management and common problems of the current state of the fastener enterprises and share the key points of governance in the hope that it can provide more inspiration for the future strategic thinking of the fastener enterprises. In addition to promoting the learning and exchange among associations, the conference also created more cooperation opportunities for all parties.

China General Machine Components Industry Association Organizes a Delegation to Visit a Smart Factory

On June 23rd, representatives

from Ningbo Fastener Industry Association, China General Machine Components Industry Association and several fastener industry associations visited a Zhoushan-based smart factory. They visited the production lines and watched the management of the factory under the warm welcome of the representatives of the factory.

Following the development orientation and requirements for "high-end, intelligent, green, lean and people-oriented", the plant takes the lead in applying new equipment, new production lines, new systems and new-generation information technologies such as artificial intelligence, Big Data, Internet of Things (IoT) and 5G to realize the digitization of the whole process, and provides an experience model and a successful path for the high-end fastener industry. Through the visit, the guests were all impressed by the factory's commitment and efforts to carry out technological innovation from a forward-looking perspective, solve industry problems and set up industry benchmarks. □
