ASCCO INTERNATIONAL CO LTD

ASCCO International Co., Ltd. has been in the field of hardware & tools for more than 30 years and has become a recognized professional manufacturer and exporter of hardware & tools in just a few years with its rich product know-how and services close to customers' needs. In order to satisfy the needs of customers in the related construction field, it extended business to the fastener field about 20 years ago. Besides supplying concrete screws, chipboard screws, drywall screws, wood screws, tapping screws, deck screws, self-drilling screws, machine screws, nail screws, and hi-low thread screws, it has also successfully developed a patented anchor plug with chipboard screw, allowing each customer to find the most suitable fastening solution according to the needs of different applications.

## ASCCO International Construction Screw Manufacturing and Diversified Supporting Solutions

variety of integrated solutions for customers' special size packaging and customization needs for construction screw applications, and can even provide more diversified choices such as plastic anchors, screw bits, or drill bits according to customers' needs.

"We want to continuously create greater added value for customers. Even though the design, molding and peripheral processing costs are not low, by adopting a diversified screw supporting solutions and strategy, we have confidence and the ability to make customers' products show industry-leading competitiveness in all aspects," said ASCCO Manager Sheng-Huo Liu.

### Taking Orders in Taiwan, While Manufacturing and Shipment from Vietnam

ASCCO's screws are mainly manufactured and shipped from Vietnam. With 350 sets of equipment, 3 heat treatment lines, 11 packaging lines, and QC equipment for straightening/drilling speed/hardness/coating thickness/salt spray/grinding/optical sorting, ASCCO is able to provide a complete solution from production, secondary processing (incl. heat treatment, plating/phosphating treatment), to packaging and inspection. Its monthly production capacity is up to 1,400 tons. With sufficient production capacity, well-established production process and quality control, as well as the advantages brought by EU-Vietnam FTA, ASCCO can help customers reduce procurement costs and greatly enhance their product competitiveness.

"Prepacked mass-produced screws are our strength, however, we can also assist in the production of customized products or special materials. At present, 100% of our market is in Europe, and we have accumulated a lot of loyal customers in Poland, Germany, Greece, Switzerland and so on. In the future, we also plan to increase the share of screws in our total sales, and make early preparations for the Middle East, ASEAN, the U.S., Japan and other markets with great potential. I am optimistic that the global economy will gradually recover as customers' inventories are gradually depleted, and there will be opportunities for mid-range and high-end screws, so I expect 2024 to be a better year for both ASCCO and our customers," says Manager Liu. ■

### Combination of Product Competitiveness and Complete Production Support

Unlike other OEM companies, ASCCO has a solid product design capability, and its self-developed anchor plug with chipboard screw released a few years ago even gained popularity in conversations of the market. In addition to its ODM capability, **ASCCO can also provide a**
