FASTENER EXPO What to Expect and Why You Can't Miss It!

The International Fastener Expo is gearing up for their 2024 show this September 9-11 at Mandalay Bay Convention Center, Halls B & C, in Las Vegas, NV. Each year, thousands of attendees from 30+ countries attend IFE to network and do business with hundreds of suppliers showcasing every type of fastener for several industries including construction, aerospace, military, and automotive. The size, scope, and diversification of the show makes it a go-to event for every stage of the supply chain.

Attendees can look forward to a widespread array of over 600 exhibitors representing the forefront of the fastener industry. From industry giants to innovative startups, the Expo Hall will be a hub of activity, offering a firsthand look at the products and services driving the industry forward. The Expo Hall will be open on September 10 from 9:30AM-4:00PM and September 11 from 9:30AM-3:30PM.

One of the highlights of IFE 2024 is its educational program. Renowned thought leaders will take the stage to share their insights on the current state of the industry and provide valuable perspectives on where it's headed. Topics such as company culture, technology, fastener finishes, electric vehicles (EVs), magnets, mitigating risk, and more are expected to dominate discussions on the Session Stage and Fireside Chat Lounge, offering attendees a deeper understanding of the challenges and opportunities facing the industry. This year's event will also include an engaging keynote presentation from Beau Groover, President of The Effective Syndicate, FTI's full-day training class, and a new 2-hour Marketing Workshop.

Additionally, attendees will be able to connect with the industry by attending networking events, like the annual Golf Tournament, Welcome Reception, and Hall of Fame and Young Fastener Professional of the Year Award Ceremony at the 2024 event.

The countdown to IFE 2024 has officially begun and anticipation is building for what promises to be a transformative event for the fastener industry. There's no better venue than IFE to foster relationships and connect with new and existing customers.

BI-MIRTH CORPORATION sales@bimirth.com.tw bi-mirth.com Screws

Bi-Mirth Corporation was founded in 1986, and ever since then our mission has been to strive to be one of the top fastener manufacturers through quality. innovation, and expertise. We have evolved and expanded from a trade company to a manufacturing company based in Gangshan, Kaohsiung with our own forming, electroplating, coating, and packaging plant with approximately 300 employees.

Our company specializes in selfdrilling, self-tapping, wood construction, and concrete screws from diameters M3 to M20 and up to 1,500 mm in length. We're also constantly researching and developing potential products for the market. To ensure our fastener quality, we have a strong quality control team in our company. We currently have CE, C4 and ETA for our European market, and the ICC certification for our American market.

Screws. Fastener KWANTEX RESEARCH IN Assortments. Threaded Fasteners.

Kwantex Research Inc. was established since 1996 and mainly devotes to Research and Design in the fastener field. We are one of the few enterprises who own the most fastener patents and collaborate with many outstanding fastener companies over the world on innovative products.

Kwantex has in total approximately 175 members of staff and extensive production capacities in Taiwan. Our quality policy is "Products, Delivery and Know-How." Our products mainly focus on high-end fasteners for constructional and industrial applications, and the majority of the patented products have already been massproduced and successfully entered the markets in many advanced countries and areas.

Kwantex will continue to revolutionize new product designs as we plan to present 1~2 new products per year, which helps our agencies or partners not only to update their product line features but also to create new markets. This innovative spirit already provided our customers with higher degree of satisfaction. All of us think, innovation is power and only new products can win.

1649 MOLS CORPORATION sabrina@molscorp.com.tw www.molscorp.com.tw

Screws

MOLS group has over 30 years of experience in screw manufacturing and operates a supply chain system with screw manufacturing, heattreating and head painting. MOLS manufactures self-tapping screws, metal roofing screws, RV screws, self-drilling screws, home appliance screws, gutter screws, triangular thread screws for various industries like construction, RV, household, wiring devices. HAVC and so on

TOLY

With over 30 years of experience to focus on the supply in the US market, MOLS is familiar with what customers' needs and dedicates to quality improvement, and treats customers' comments as treasure, we listen to customers and respond to their needs at our best. MOLS provides our best to all of our customers and uses our valuable resources to create maximum benefits for our customers.

SPECIAL RIVETS CORP. **** rcrivet@ms12.hinet.net www.srcrivet.com S·R·C

Rivets / Rivet Nuts Air Tools, Hand Tools,

Special Rivets Corp. (SRC) is one of the leading developers and manufacturers of full-line blind rivets, blind rivet nuts and high quality riveting tools. They are also one of the largest rivet manufacturers in Asia. They currently produce over 500 million blind rivets and 100,000 riveting tools per month. A fully automated warehouse and index system ensures accurate and rapid order fulfillment.

Over the past 40 years, they have sold to more than 150 countries and accumulated more than 700 customers worldwide. In addition to their China plant they have opened a new 45,000 square meter plant in Thailand in 2022 to meet the increased demand for their products in the U.S., Europe, Southeast Asia and around the world.

The Thailand plant has 50% of area currently in use and has about 110 autoforming machines. At this stage, SRC is aiming at a monthly capacity of 100 million pieces of rivets for the Thailand plant, and planning to increase to 300 million pieces of rivets in the future.

SCREWTECH INDUSTRY

All-new Powerful "Hi Cass" to be Unveiled This October

Screwtech: A Leading Supplier of Precision Screws Makes a Second Appearance at IFE

Through specialization in the production of M1-M14 precision screws, Screwtech has expanded its supply to the automotive and medical industries, becoming an irreplaceable player in the global precision fastener supply chain. Their excellence in technology and A+ services have earned praise from European and American clients, fostering long-standing partnerships for many years.

Having just celebrated their 25th anniversary this year, the company has announced its return to IFE after several years. "We are exhibiting again to reconnect with long-time clients," Screwtech said, "but also to participate in the booming business opportunities in the U.S. and add more new local customers."

Targeting Automotive, Electronics, and Medical Visitors

Due to the pandemic, Screwtech had not exhibited at IFE for several years. "We hope to be a part of the booming business opportunities in the U.S. and contribute our expertise, as well as to add more new local clients," they said. The company will present their special screws, which can be custom-manufactured according to customer drawings and specific needs. These screws are available in small quantities with a diverse range of products, and come with flexible delivery times and readily available inventory. Screwtech is ISO9001, IATF16949, ISO14001 and QC080000 certified, and actively works to minimize their environmental impact. They meet ESG requirements by using inverter air conditioning systems to reduce electricity consumption, installing solar-powered electricity facilities and water-saving equipment, and reducing paper and plastic consumption.

Screwtech Web Shop: A Favorite Among Buyers

With over 25 years of experience supplying the industry, Screwtech understands the size ranges and needs of their clients, including the need for samples, small quantities, and diversity. Therefore, they launched a web shop for clients to choose sizes, try samples, and proceed with repairs online, eliminating lengthy production times and additional tooling costs. The web shop has been a hit since its launch, with more than 5,000 visitors per month.

New Product Preview: Hi-Cass Highly Rust-resistant and Anti-corrosion Bolts and Nuts

Screwtech revealed their newly developed product to Fastener World: Hi-Cass Highly Rust-resistant and Anti-corrosion Bolts and Nuts. This product is ideal for outdoor equipment, solar brackets, energy storing equipment, and charging systems. It has been certified to SGS-approved Cass 200-hour test under RoHS and ASTM B368, and has achieved resistance against more than 2,000 hours of neutral salt spray test. This product will make a significant contribution to protecting outdoor equipment against rust and corrosion, and will be grandly revealed this October at the Energy Taiwan show!

CHIN LIH HSING PRECISION ENTERPRISE Increases Production Capacity to Expand U.S. Auto Repair Parts Market Share

With extraordinary craftsmanship in machining, Chin Lih Hsing works closely with international auto parts companies and sells up to 90% of its automotive fasteners to the U.S. and Europe. The company takes pride in its ability to customize products based on customers' specific requirements. Their factory is equipped with 200 automatic lathes, 30 CNC lathes, 12 slotting machines and many secondary processing machines. This comprehensive setup enables them to achieve a substantial monthly production capacity of up to 80 million pieces, ensuring a stable supply with unwavering focus on quality and competitive pricing. They continue to pursue high quality and improve process control by adding process control systems to enhance production management.

Focus on the Automotive Parts Customer Base at IFE

At this year's IFE, Chin Lih Hsing will mainly display CNC parts and a wide range of threaded inserts in various materials and sizes, mainly for molding of plastic injection, heatstake, ultrasonic embedment and other applications. "The U.S. market has always been the primary market for fasteners, and American customers have always been our main target. IFE is the most well-known fastener professional exhibition in North America and has a large number of participants, so we hope to reach out to a wider customer base and develop the US market with new and existing customers to seek more collaboration opportunities," said the company. It has more than 35 years of experience in the machined parts industry and nearly 20 years in the field of automotive parts manufacturing, so it especially hopes to expand

the customer base of automotive parts. Further, it also looks forward to collaborating with various other industries to ultimately increase sales in the U.S. market.

ISO 9001 and IATF 16949 Certified

The company continues to pursue high quality and improve manufacturing processes, adding process control systems to improve production management. They also continue to invest in quality control equipment, including 11 optical sorting machines and a new 2.5D projector, hoping to enhance their capability through continuous improvement and progression to be the best support for customers. They are ISO 9001 and IATF 16949 certified, and can provide professional technical consulting services and assist customers in overcoming parts assembly problems. Chin Lih Hsing values the importance of quality requirement and is the best partner for customers looking to expand business.

GREEN Outlook and Production Capacity Improvement

In addition to conducting carbon inventory as well as carbon footprint assessment and monitoring, the company can also provide CBAM reports required by the EU. It is currently going paperless and has significantly reduced the use of paper. Through the introduction of a process management system, waste in the manufacturing process and carbon emissions are more effectively controlled and reduced.

Providing diversified products to meet customer needs has always been the company's goal. It hopes to improve capabilities and quality level through continuous progress to become the best support for customers.

PRESHOW FEATURE OF IFE

Booth No. 1643

J. T. FASTENERS SUPPLY Breaking Through Difficulties and Creating a Bigger Rivet Nut Market

J. T.'s team has nearly 30 years of experience, and is a manufacturer, supplier and exporter of hardware parts and fasteners whose customizability is globally and highly recognized. They focus on long-term collaborative relationships with customers, provide customers with immediate responses and handling, and uphold the attitude and spirit of jointly solving problems with customers and giving full responsibility. The professional team can deliver high-quality products and excellent services on time. Through sincerity and hard work, they have achieved stable growth in the international market.

Highlight at IFE: Multi-material Split Rivet Nut

J. T. will mainly display rivet nuts, stamped parts and customized products at IFE. Customers can witness their high quality and customized services. In recent years, their manufacturing technique has achieved new breakthroughs and they have developed split rivet nuts of different materials. In the past, Taiwanese manufacturers could only manufacture iron split rivet nuts. After continuous development, J. T. has successfully made white iron, aluminum, and copper split rivet nuts into reality.

Target: Rivet Nut Buyers

Rivet nuts are J. T.'s main product. They hope to find buyers at IFE who use rivet nuts and can collaborate with them for a long time. "In the past, the pandemic forbade us from meeting face-to-face with customers. When we participated in the show last year, we found our relationship with customers becoming closer, which prompted us to decide to participate again this year. Although the U.S. economy is currently relatively sluggish, the market range is still larger than expected. It's so big that we are willing to try this show again," said J. T. Through participating in the show, they will not only spread their expertise and knowledge in rivet nuts to visitors, but also hope to let American customers see that J. T. can provide standard products as well as products that meet high-quality requirements.

Applying for IATF 16949 and Recognized by D&B

The team is applying for the IATF 16949 certificate and is expected to receive more orders for automotive fasteners. In addition, they were awarded the "10th Dun & Bradstreet Award for Taiwan's Elite SMEs: Top 1,000 Elite Enterprises" last year. "Dun & Bradstreet certification is a credit certification service. If overseas buyers know that we have passed D-U-N-S certification, this can increase their trust in us, so it is of special significance to us," said the company.

New R&D Focus on EVs and Green Energy

In recent years, the world has attached great importance to environmental protection and air pollution issues. J. T. has reduced carbon emissions in energy through the optimization of electricity consumption and the use of environmentally friendly items. In addition, more and more car manufacturers are designing different styles of electric vehicles. The company hopes to develop products related to electric vehicles and green energy with more customers in the future. In March next year, they will exhibit in Stuttgart to expand their European market share in addition to expanding sales in the U.S.

PRESHOW FEATURE OF IFE

Booth No. 452

SACMA MACHINERY CORPORATION will attend the 2024 International Fastener Expo, at Mandalay Bay, Las Vegas, being held September 9 to 11, 2024, Booth #452.

During the show, Sacma will introduce the Double Blow Header with threading unit model KSP12 ALL-IN-ONE to run fasteners from M3 to M8 with max. shaft length 60mm. The KSP12 combines typical SACMA solutions, proven by thousands of machines, with the most advanced mechatronic technology available in the market. The one-piece main frame, cast perlitic iron, normalized, natural aged for at least 12 months, high precision machined, is a guarantee of rigidity and stability for all the machine life. Major setup adjustments are now motorized for a quick and friendly changeover: S-feed wire feeder driven by torque motor, motorized wire stock gauge and DKO, threading starter driven by torque motor with self-learning function borrowed from Ingramatic rollers. The high productivity ALL-IN-ONE allows to quick return and the legendary long life guarantees future profits.

Sacma will also emphasize the new series of SP270 now available in two versions, standard with mm.60 dko and EL with mm.90 dko. The SP270 equipped with mm.11,5 diameter cutoff capacity and features the most advanced controls and systems for forming net and near net shapes with consistent and repeatable tolerances up to 275ppm. Some of the unique features include: One piece cast bed frames and heading slides with forged crankshafts for maximum rigidity and stability for the tooling and machine components gives precise part forming and reduced maintenance cost. The Sacma Desmodrive transfer design with its n.7 fingers is the most reliable, accurate and lowest maintenance cost transfer available. The transfer provides the most flexibility of any design, allowing our customers the ability to form a wide range of part shapes and the ability to actually form nut and bolt shapes on the same machine.

In addition, Sacma Group will introduce Ingramatic which is the designer and manufacturer of innovative thread rolling machines. From TR00/W000 to TR9/W70, the "I-Thread" machine line provides innovative features like the motorization of the die match adjustment, the single/double starter unit driven by torque motor/servomotor, the full-motorized adjustments from touch screen panel and the QTC washer assembly unit and pointing machines. As per Sacma, additional packages may be added to the configuration of the machines to extend the possibility of the threaders as the headless parts feeder, the loading systems and the Warm Forming unit.

The team will also describe the program of machineries from the branch HS Automazioni srl supplying a wide range of automatic machines to run preformed parts obtained by cold and warm forming. The company designs and manufactures a range of machines branded HS ASPE, which consist of tapping machines, combined machines, transfer machines and multi spindle turning machines. HS ASPE is following the industrial strategy of the Sacma Group with outstanding assembly lines divided by product family and following a modular system concept with serial production to make the machines extremely precise and durable.

SACMA MACHINERY CORPORATION personnel will be pleased to welcome visitors at the Mandalay Bay exhibition center, Booth #452, to show and explain all the technologies.

JC GRAND Superb Fastener Manufacturing & Service Meet Global Industry Demands

JC Grand is a leading manufacturer and exporter of industrial fasteners and metal hardware components. Since 1978, JC Grand has been serving customers globally with an extensive line of high quality screws, nuts, bolts, washers, anchors, and customized hardware products from its wholly-owned factories in Taiwan and China. All of its locations are ISO 9001 certified, and solely focused on delivering products and services of exceptionally consistent quality to its clients worldwide.

Certified Facilities and Full-Range Capabilities

The company consists of a main office in Taipei, three ISO-9001 and IATF-16949 certified production facilities in Kaohsiung, Taiwan, and an 800,000 square feet vertically-integrated factory in Zhejiang, China, all connected and managed by the same SAP ERP system. In addition, JC Grand owns and operates an A2LA certified (ISO-17025) mechanical testing laboratory in Kaohsiung. Technical staff and internal production cover fastener design, cold heading, self-drilling point forming, continuous line heat treatment (neutral, carburizing and carbo-nitriding), optical and roller sorting, washer assembly, custom packaging and logistics.

New Surface Coating Factory Open in Kaohsiung

As of 2022, JC Grand has opened and is currently operating a new, surface coating factory in Kaohsiung focused on the prevention of fastener corrosion in severe outdoor environments. This facility has two principal workflows and equipment: the base coating cold welds, diffuses and seals proprietary multi-metal powders onto the fastener substrate, and the other applies thermoset organic topcoats and friction modifiers on top of the base coat via automated dip-spin lines.

It dispatches more than 300 containers (4,500+ tons) of fasteners every month to over forty countries and employs more than 300 sales and factory personnel. It is equipped to produce both standard and customized fasteners that meet all industrial requirements.

Catering to the following select industries

- Professional Construction
- Retail Packaged DIY Fasteners
- Home & Commercial Appliances
- HVAC (Heating, Ventilation, Air-Conditioning)
- Electrical Fixtures & Lighting
- Machinery & Motors
- Automotive

Whether you are an industrial manufacturer, OEM or wholesale distributor, professional contractor supplier, or retail-focused operation, "We understand your needs and have the experience and capability to consistently meet them. Our goal is to establish and maintain a long-term, mutually beneficial relationship with our customers, and to provide a level of service that exceeds expectations," said JC Grand.
