2022 Good Design 設計獎得主

## Screwdriver Bit [Slender and Hard Bit]

This product is an ultra-thin shaft driver bit. For example, it is easy to use in “narrow and obstacles-filled” work places such as around sashes at construction sites, installing handrails, and installing outlet boxes for electrical work, and contributes to improved workability.

Manufacturer: Kaneko Mfg. Co., Ltd.

## Hexagon Key Wrench With Retaining Ball Type

A colored hexagon key wrench that can hold hexagon socket head bolts. The bolt is held by the action of the spring and the steel ball embedded in the tip. Since it is not necessary to hold the bolt by hand, it contributes to the improvement of work efficiency when the bolt is brought into the screw hole in a deep place or when it is loosened and removed.

Manufacturer: Asahi Metal Industry Co., Ltd.

## Standard Ratchet [nepros 3/8"sq. Ratchet Handle NBR390A]

This product is intended for use in automobile maintenance and machine maintenance. Recently, in the workplace where obstacles are increasing due to auxiliary equipment, products with compact and lightweight heads are required. It is necessary to develop a ratchet handle that will satisfy professional mechanics who do not choose working conditions such as tight spaces and heavy loads.

Manufacturer: Kyoto Tool Co., Ltd.

## Round Swivel Head Ratchet [3/8"sq. Round Swivel Head Ratchet]

This product is intended for use in automobile maintenance and machine maintenance. Featuring a compact head that rotates freely in the workplace where obstacles are increasing with modern auxiliary equipment, the small head can be used for work in tight spaces or for quick rotation like a screwdriver. A utility hand tool that can be used for loading and fast-forwarding tasks.

Manufacturer: Kyoto Tool Co., Ltd.

## Dust Collection Circular Saw

This electric power tool is mainly for cutting wood and metal materials. Even as a stand-alone product it keeps the work environment clean with extremely high-efficiency dust collection, and its mode to suppress cutting noise is considerate to others nearby. Thorough safety features prevent job-related accidents such as from kickback. The product lets workers safely focus on high-quality results.

Manufacturer: Koki Holdings Co., Ltd.

## Pipe Hangers [RAKU-TSURI X]

Raku-Tsuri X achieves manpower and installation time reduction. Comparing with traditional pipe hangers, Raku-Tsuri X saves about 70% installation man-hours with electrical tools. In Japan construction workers decreased 30% in the last 20 years, and as the aging population progresses, its age composition of over 55 is 34%. Raku-Tsuri X contributes significantly to building equipment business.

Manufacturer: Nichiei Intec Co., Ltd.

## Pipe Fitting [TL joint]

(1) A zigzag-design nut has been adopted with the aim of reducing the weight of the material and the rigidity that can withstand wrenching during piping construction work. (2) For high temperature piping, the end face of the nut is designed in red so that it can be identified as heat resistant. (3) The washer, which is the loosening prevention mechanism of the main body, is designed in blue.

Manufacturer: CK Metals Co., Ltd.
