

Insulated Screwdriver for Electricity Meter

A special tool for attaching and detaching special screws that secure electric meters (smart meters, etc.). The special screw has a shallow fit with a normal flat-blade screwdriver, and was sometimes dropped and lost during work. This product can smoothly perform a series of tasks such as removing screws, catching them, storing them, and reinstalling them, contributing to increased efficiency.

nepros 3/8"sq. Ratchet Handle Series

This product is intended for use in automobile maintenance and machine maintenance. Recently, in the workplace where obstacles are increasing due to auxiliary equipment, products with compact and lightweight heads are required. It is necessary to develop a ratchet handle that will satisfy professional mechanics who do not choose working conditions such as tight spaces and heavy loads.

Manufacturer: KYOTO TOOL CO., LTD.

Lightool Spanner /Combination Wrench

Obtained JIS standards while thoroughly reducing weight. The same strength as conventional work tools has been achieved. The weight reduction is effective in improving workability, making the tool easier to carry, and reducing fatigue. In addition, the light weight of the handle part is different from existing tools. Name tags and grips can be easily attached, allowing for easy customization.
